

TECHNICAL DATA SHEET

Eurovent **WEDGE**

Valley wedge made of polyurethane foam and coated with adhesive. Ensures fast and easy sealing of the roof valley and protects the roof covering against penetration of moisture, wind and rain. Flexible structure allows to adjust the element to the shape of roof covering.

PARAMETER	UNIT	VALUE
Material		polyurethane foam
Size	[mm x mb]	60 x 30 x 1
Pallet	[pcs]	2 000
UV resistance		resistant
Weight	[kg]	ca. 5
Box	[pcs]	200

Advantages:

- Weatherproof
- Fast and easy application
- Neat finishing

Eurovent **WEDGE**

Application:

Valley wedge is designed for use as sealing element in roof works – most commonly in the valley area. Protects against penetration of wind-driven snow, rain, moisture and dust. Flexibility and closed-cell structure ensure tight sealing while the layer of adhesive allows for fast and easy installation on the roof valley.

Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. Rolls should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be observed. The product should be protected from chemical agents, in particular solvent based substances, as they can reduce technical parameters of foil or permanently damage it.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
