

TECHNICAL DATA SHEET

Eurovent **CANTILEVER L**

The Eurovent CANTILEVER L ridge batten bracket, a mounting element for „sheet” type ridge batten with a regulated bracket. It is used as a mounting element for ridge batten installation in ventilated sloping roofs. Made of galvanized steel and characterized by increased durability and resistance to cracking.

PARAMETER	UNIT	VALUE
Material	[Norm PN-EN 10346/2011; PN-EN 10143/2008]	Steel DX51D
Covering	[Norm PN-EN ISO 40 42/2001]	Electrolytic tin coating with a thickness of not less than 8 μ
Characteristic load capacity	[kN]	
Thickness	[mm]	
Width	[mm]	40; 50
Total length	[mm]	
Body length	[mm]	
Head length	[mm]	
Box	[pcs]	100
Pallet	[pcs]	3 200

Advantages:

- Efficient installation of the ridge batten
- Fast and easy installation
- Resistance to ageing

Eurovent CANTILEVER L

Application:

The Eurovent CANTILEVER L ridge batten bracket is used as a mounting element for ridge battens. It ensures proper positioning of the batten and enables fast and reliable installation of ridge tiles to the ridge batten. The construction of the bracket makes it possible to adjust the height of its installation on the ridge and an additional possibility to adjust the height of the ridge batten bracket.

Installation:

Eurovent® BRACKET L is attached to the wooden roof structure by attaching the support arms to the roof rafter.

Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. Rolls should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be observed. The product should be protected from chemical agents, in particular solvent based substances, as they can reduce technical parameters of foil or permanently damage it.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
