

TECHNICAL DATA SHEET

Eurovent **CANTILEVER N**

The Eurovent CANTILEVER N ridge batten bracket, a mounting element for installation of the ridge batten in ventilated sloping roofs of the NORD type with an integrated screw. The bracket is made entirely of galvanized steel and characterized by high durability and resistance to cracking. The screw enables quick and precise installation as well as immediate change of the installation level of a bracket.

PARAMETER	UNIT	VALUE
Material	[Norm PN-EN 10346/2011; PNEN 10143/2008]	Steel DX51D
Coating	[Norm PN-EN ISO 4042/2001]	Electrolytic tin coating with a thickness of not less than 8 μ
Characteristic load capacity	[kN]	
Width	[mm]	40; 50
Length	[mm]	180; 210; 260
Box	[pcs]	100
Pallet	[pcs]	3 200

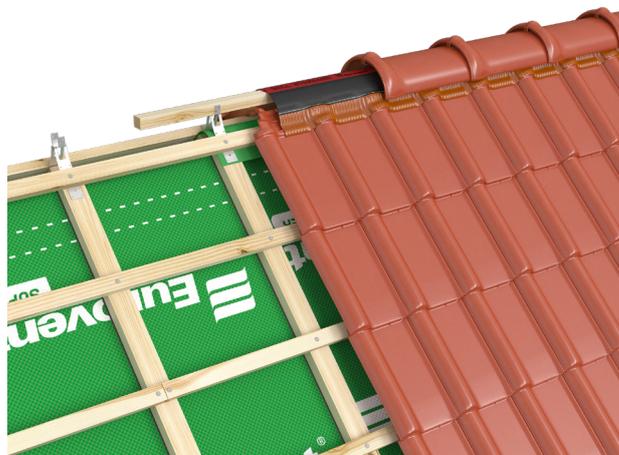

Advantages:

- Efficient installation of the ridge batten
- Fast, easy and precise installation
- Resistance to ageing

Eurovent CANTILEVER N

Application:

The Eurovent CANTILEVER N ridge batten bracket is used as a mounting element for ridge battens. It ensures proper positioning of the batten and enables fast and reliable installation of ridge tiles to the ridge batten. Several different sizes of the bracket makes it possible to use it for different sizes of ridge battens.

Installation:

Eurovent® BRACKET N is attached to the wooden roof structure by screwing in the mandrel bracket into the roof structure.

Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. Rolls should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be observed. The product should be protected from chemical agents, in particular solvent based substances, as they can reduce technical parameters of foil or permanently damage it.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
